

# PLUS EQUALS

## The best work comes from collaboration.

Expert web apps that integrate effortlessly with your present systems.

The bigger your business, the more likely it is that you need to update the systems that make your business run. You need experts who can flawlessly integrate new functionality into your existing (and potentially dated) systems.

### THINK SMALLER

Most agencies offer full-service software development, but require a huge commitment—even for smaller projects. We're a smaller shop with limited core offerings, and can easily scale projects to fit budgets.

### KEEP WHAT WORKS

Technology advances, but no business can scrap and recreate tech tools and workflows every three years. We can work with what exists, seamlessly integrating our solution into your existing ecosystem and creating a partnership for ongoing upkeep.

### OUR <STYLE>

Plus Equals does a thorough tech audit before beginning any project. Our SOWs explain exactly how old and new tech fit together—and why they'll continue to work together for the life of the workflow.

Plus Equals makes sure you know exactly what we're going to accomplish and how we're going to do it, with upfront pricing, clearly defined deliverables, and constant communication. We keep our explanations fluff-free and straightforward, because who has time for anything else? Collaboration is at the very foundation of our work.
